

PVRI Pre-clinical & Molecular Science Report 2017

Mandy MacLean & Duncan Stewart

The Pre-clinical & Molecular Science Task Force met for the second time at the PVRI 11th Annual World Congress in Miami in January 2017. They held a well-attended one-day workshop discussing issues of female sex in PAH and the effects of oestrogens. This was run in conjunction with the Women's Health & Pregnancy Task Force led respectively by Mandy MacLean and Anna Hennes.

At the 12th PVRI Annual World Congress in Singapore, the Task Force will run another one-day symposium on the topic:

- **How to improve preclinical studies in PAH**
Focus on reproducibility and research translation.

This will be organised by Sebastien Bonnet, Soni Pullamsetti and Duncan Stewart.
